

# BLINKOTV DESKTOP BROADCASTER

This presentation outlines the general features of the BlinkoTV Broadcaster

## 1 BEFORE CONNECTING TO THE SERVER

- Select Video Source and Format
- Select Bit Rate and Video Entry and the Channel if Applicable
- Select Audio source
- Enter User Credentials and Connect

The screenshot shows the BlinkoTV Broadcaster software interface with several callout boxes providing instructions:

- Select your Video Feed**: Points to the Video Source dropdown menu.
- Video Format of the Web Player - Highly recommended**: Points to the Video Format dropdown menu.
- Stretch the Video Feed to fit a certain player size**: Points to the FPS and Encoding dropdown menus.
- Upload speed (Higher = Better quality)**: Points to the Bit rate dropdown menu.
- If Video source has more than one format, select the format to push the player**: Points to the Video Entry dropdown menu.
- Audio settings**: Points to the Audio Source, Sample Rate, and Bit Rate dropdown menus.
- User login information**: Points to the Username and Password input fields.
- Connect to server**: Points to the Connect button.
- If using a source with multiple channels, select the channel to push the player**: Points to the Channel dropdown menu.

## 2 ONCE CONNECTED

- Select your channel
- Check the Preview window to make sure the correct video feed has been selected
- Start Broadcast

\*NOTE\* "No Audio" selection is currently being developed. You must select a different audio feed and mute it from your PC to send a broadcast without sound
