Do you require LIVE broadcasting from the field? We have the answer. Going mobile with BlinkoTV has never been easier.

Any business or public service can broadcast using BlinkoTV from remote locations such as:

- News agencies
- Entertainment promoters
- Medical
- Insurance
- Engineering
- Law enforcement
- Real estate
- Utility companies

Download your FREE copy of BlinkoTV and start broadcasting in 3 minutes!

## Broadcast high quality 30 frames per second video, MP3 stereo sound from broadband cell services.

Shown is a PC tablet, cam, and Verizon wireless USB broadband stick.

With BlinkoTV there are no restrictions to broadcast LIVE entertainment or corporate events. Broadcast your LIVE events from the field, production line, or even from the beach. All you need is the latest broadband reception service with a minimum of 200Kbps upstream, a laptop and a microphone. In some cases wireless cards as shown are capable of over 1Mbps (depending on range of service offered and site location).

Broadcasting with mobile devices is the answer to medical and engineering applications where training on from the field is required. Going mobile with BlinkoTV has never been easier. [Download your FREE copy of BlinkoTV](#) and start broadcasting in 3 minutes!
